

I am writing in regards to NAB Petition 04-160. I oppose this petition and urge that you reject it. I pay a monthly fee to receive XM Satellite Radio because they provide entertainment and information that is just not available on "public" radio. Their traffic and weather stations provide up to date information in a format that is, by far, greater than our local radio stations. Also, it allows me to check the traffic and weather in a city that I may be travelling to, which local stations CANNOT provide. Again, I respectfully urge you to REJECT 04-160. Thank You!
